

Company Overview

Specialist in fabrication and installs

Capability Statement:

Ironmonger Fabrications was established in 1999 and over the past decade has developed a reputation for the completion of specialist fabrication and installation projects to stringent quality and engineering parameters.

Ironmonger Fabrications are highly skilled in manufacturing items from stainless steel, aluminium and mild steel to create structures, pressure vessels and piping. Ironmonger Fabrications have established customers in the dairy, water and mining processing areas and are well equipped and qualified to keep up with the high demands in these industrial sectors.

The Ironmonger fabrication and install team are multi skilled and owners and management have invested to ensure that all parameters for quality, safety and the environment are compliant with Australian Standards, contract and site specific requirements.

The Company have a well equipped and secured workshop with good yard access for loading and unloading of semi trailers.

The investment in equipment makes Ironmonger Fabrications very self sufficient, which also allows them to offer competitive pricing.

The team at Ironmonger Fabrications take a great deal of pride in producing and installing quality products on time and at the same time maintaining safety for their staff and their customers whilst working on any site.

The photographs on this page reflect some of the work that has been produced and installed by Ironmonger Fabrications.

Technical Specifications

PRODUCTS

We are equipped for all types of fabrication from light sheet metal to high pressure piping and vessels in many types of materials

The above includes :

- Tanks
- Conveyors
- Skid bases
- Bends , reducers and pipes of varying orientations and pressures
- Structural frames and stands
- Sheet metal products
- Site Repairs

CAPABILITY AND SERVICES

Materials– we can fabricate and weld all ferrous and non-ferrous metals including:

- Stainless Steel
- Carbon Steel
- Aluminium
- Alloy
- Copper and other exotic materials

Forklift

Guillotine

Press Brake

Low and high speed saws

Pulse, mig and tig welders

Coded in house and mobile welding

Welding codes covered:

- As 1554 .5
- As 1554 part 6
- As 1554.1
- As 3992-1998
- AWS D1.1
- ASME 1X

Polishing

Installation –As well as the fabrication and install ,we can arrange, site measures, surface coating and delivery of your complete package if required.
