

Company Overview

Quality Wholesale Signmakers

Sigtalk is Australia's only dedicated, wholesale custom sign-maker. With no retail market channels at all, we focus exclusively on Trade clients like you. At Sigtalk, we do more than make signs. We give you the freedom to grow your business rather than getting locked into back-end details.

- Specialised advice on how to handle the large, difficult, and sometimes near-impossible jobs you may otherwise walk away from.
- Quality that comes from years of experience; dedicated processes and specialized equipment.
- Cost savings due to our economies of scale and operational focus.
- Peace of mind, knowing that Sigtalk is always a partner, and never a competitor.

Sigtalk can manage the entire order to Installation process, allowing you to focus on your business, your clients and the things that matter most. Supply us with the artwork and installation details, and leave the rest to Sigtalk.

Sigtalk can:

- Develop working designs from concept artwork
- Source specialised products and materials
- Manufacture the sign and any associated parts
- Arrange delivery and installation anywhere in Australia
- Provide Engineering drawings and certifications
- Arrange council approvals and licenses
- Liaise with third parties (builders, architects etc)

Sigtalk will take care of as much or as little as you need to complete your project. The important thing is for you to focus on your clients to ensure that their ideas and concepts are developed.

Services

Plastic fabrication of acrylic letters, logos and complex shapes is a specialty. With a custom-built plastics oven, a range of specialised workshop equipment and skilled fabricators, Signtalk can successfully complete the most challenging assignments.

Electrical assembly - Light boxes of all kinds, internal or external illumination, electrical installations or simply including a compliant, tagged plug and lead.

Finishes, from a simple coat of black or white to a colour match, or even a specialised patina are applied by our trade-qualified painter in our side-draft paint booth. We match colours, finishes and patinas to provide just the look you need.

Graphics are fitted by our Sign writer. We can make them in-house using our CNC Vinyl Cutter, or fit graphics supplied by you. If needed, we can arrange full-colour prints from your artwork.

Installation - Signtalk has installed almost everywhere - rural settings, roadsides, shopping centres, offices, walls, or on top of multi-story buildings. Let us help you with council approvals and compliance issues.
