

## Dear Members,

January 28, 2016

I am pleased to announce that from the 1st February I will be working in a part time role on business development for EMICoL.

I am really looking forward to being your representative out at the coalface seeking opportunities to develop business, and reporting back to you and the Board of Directors on progress.

EMICoL is now one of the longest-lasting engineering Cooperatives in WA and we want to ensure it stays that way. The credit for EMICoL's survival must go to those who participate.

### My Initial Objectives

- Grow membership.
- Visit current members, explain what I am doing and ask how I may be able to assist, with a view to encouraging members to have more active involvement in the future.
- Review opportunities to augment current members' participation.
- Visit relevant councils and industry bodies (e.g. EMRC) and review initiatives for Cooperatives
- Assist new members in compiling details of their capabilities for inclusion on the EMICoL website
- Produce a monthly activities report
- Assist in organising, and attend, EMICoL functions for networking

At all times whilst I am working on the above, I will be looking for new openings with various organisations that may support and further enhance our EMICoL Cooperative which I hope in turn will bring new prospects for you the members

Yours sincerely

John Morris
